Myform Regen

Consists of an innovative molecular structure that makes it particularly elastic and resistant to room temperature, absorbing weight to reduce the sensation of perceived firmness, resulting in comfort in any rest position.

Myform Memory Air HD

Gradual response material with extremely small molecules for enhanced adaptability to body shape and exceptional breathability.

Myform Memory Clima

Designed for positioning on the outermost mattress layers, thanks to a specific application that leverages nanotechnologies to maintain a constant contact temperature between body and mattress.

Comfort Suite Cover

An exclusive and patented pillow top system, providing unbeatable and excellent comfort, also thanks to the fine capitonné quilting.

Fabric

Contains fresh and soft viscose, for excellent breathability and the perfect functioning of fine fillings, guaranteeing excellent rest comfort.

Padding

The refined tradition of silk and purity of organic cotton encounter Ingeo and Myform technology, culminating in an unbeatably fresh and soft filling.

Removable Cover

The zip fastening around the edge enables the cover to be divided into two parts, for easy and practical washing.
