- 7 Myform Extension cm 8
- 8 Myform Air cm 5,5

Myform Memory Clima

Designed for positioning on the outermost mattress layers, thanks to a specific application that leverages nanotechnologies to maintain a constant contact temperature between body and mattress.

Myform Memory Air

Thanks to its innovative molecular structure, it combines excellent adaptability to body shape with unbeatable breathability, guaranteed by the high level of porosity and open cell structure.

Prime Cover

Breathability and perfect hygiene guaranteed by the microperforated side band, combined with the solidity of the traditional removable cover.

Fabric

Hygienic, breathable and comfortable thanks to the softness of viscose and the wash resistance guaranteed by the elasticity of polyester microfibre.

Fibersan treatment

A natural lavender and eucalyptus treatment prevents the proliferation of mites, maintaining a high level of cover hygiene.

Padding

Designed to provide excellent hygiene and wash resistance. On both sides it is made of a blend of fresh and hygroscopic bamboo, with elastic and robust polyester microfibre.

Removable Cover

The zip fastening around the edge enables the cover to be divided into two parts, for easy and practical washing.
