Myform Memory

The typical sensation of pleasant softness generated by memory combined with a faster and more elastic return reaction, for a less enveloping sensation and greater ease of movement during sleep.

Myform Memory Air

Thanks to its innovative molecular structure, it combines excellent adaptability to body shape with unbeatable breathability, guaranteed by the high level of porosity and open cell structure.

Myform Extension

Elastic, breathable and provides excellent support, balance and solidness. Guaranteed duration over time, constant performance levels and high resistance to stress.

Prime Cover

Breathability and perfect hygiene guaranteed by the microperforated side band, combined with the solidity of the traditional removable cover.

Fabric

Hygienic, breathable and comfortable thanks to the softness of viscose and the wash resistance guaranteed by the elasticity of polyester microfibre.

Padding

Both sides are made of polyester microfibre that ensures elasticity and softness for excellent wash resistance.

Removable Cover

The zip fastening around the edge enables the cover to be divided into two parts, for easy and practical washing.
