- 7 Highly breathable polyester microfibre fabric

Myform Regen

Consists of an innovative molecular structure that makes it particularly elastic and resistant to room temperature, absorbing weight to reduce the sensation of perceived firmness, resulting in comfort in any rest position.

Myform Memory Air HD

Gradual response material with extremely small molecules for enhanced adaptability to body shape and exceptional breathability.

Myform Memory Clima

Designed for positioning on the outermost mattress layers, thanks to a specific application that leverages nanotechnologies to maintain a constant contact temperature between body and mattress.

Myform Air

Designed and built for use in warmer seasons, or for those in need of excellent breathability. The structure contains a high number of channels that guarantee the passage of air for all kinds of use.

Essense Cover

Designed for those looking for a product that is easy to wash, fast-drying and ensures excellent reactivity of the inner mattress structure.

Fabric

Made with a special three-dimensional finish, guarantees excellent breathability and the rapid elimination of humidity, for a perfect rest microclimate.

Removable Cover

The zip fastening around the edge enables the cover to be divided into two parts, for easy and practical washing.
